

THE EASTERN IOWA DXER

SUMMER 1988

CLUB NEWSLETTER OF THE EASTERN IOWA DX ASSOCIATION

CLUB OFFICERS

President: KJ0H John Schwandke

V.President: W0WP Tom Lindgren

Sec/Treasurer: NB0H Jack Muckler

Awards & Contest Chairman: NU0P

Newsletter assistant: W4NIM Bob Hill

Editor's NOTE

The EIDXA Newsletter will be published and distributed at least 10 days prior to EIDXA club meetings. The paper is a good way for you, an active member in the organization, to express your views and share your ideas with fellow members. I will do everything within my power to make the newspaper interesting and accurate.

de W0WP

SUMMER MEETING

The Eastern Iowa Dx Association's next meeting will be held on the first day of the Cedar Valley Amateur Club's Annual Summer Hamfest, August 13th at 2PM. The meeting room in the IBEW Hall will be used. Note this is a new location for the 2 day hamfest. This will be an open meeting for guests from the hamfest to attend (bring a friend). A short business meeting is planned with a Dx-pedition video or slide show to follow.

EIDX A MINUTES APRIL 15, 1988

President John, KJ0H, called the meeting to order at 7:35 PM in the Muscatine Community College Board room Muscatine Iowa. John thanked W0BUB, one of the directors of the college, for making the Board room available for the Spring meeting.

K0IIR, Clark, introduced his guest Lee, W0BX, a seasoned amateur radio operator since 1926. Lee has been active on both Phone and CW. His 1st license, brought for display, was most interesting especially the restrictions imposed at that time.

John, NU0G, one of the guests from the Burlington/Davenport area, gave an interesting description of their field day set-up and related their plans for the '88 FIELD DAY outing.

Dave Moore, WE0B, a guest form the Clinton area, introduced himself and retraced his license history beginning with his 1956 DL4 to HL9 to W9 and now back to Iowa. Dave is restarting his DXCC from his Iowa QTH.

WD0AWL, Terry, introduced his guest Jim, WD0HMA, a big VHF gun from the Ainsworth area.

Guests for the evening were--W0BX (Lee McKee), WD0HMA (Jim Snead), WB0B (Larry Newby), WB0UKZ (Terry Parl), WE0U (George Gruenthaler), N0ICI (Grant Kesselring-K0JGH's son), WB9UFB (Ken Martin), KA0KNT (Kirby Heffmann), WE0B (Dave Moore), NU0G (John Mayfield), and WA0YGX (Andrew Hoth).

Members present were--KJ0H, NB0H, W0WP, NU0P, K0VZR, K0GVB, K0IIR, WD0AWL, WB8ZRL, KE0Y, K0RW, K0JGH, K0GT, AB0M, WE0M, W0IZ, NC0O, KF0Z, and KC0Q. (A great turnout 11 guests and 19 members.)

Tom, NC0O, reported that an average of 8 to 12 checked into the Sunday evening nets. He also noted that the net will continue to be held throughout the summer, Sunday's as usual.

Contest committee chairman Steve, NU0P, distributed the special EIDX A Golden Jubilee DXCC stickers. W0IZ (261 countries), W0WP (233), AB0M (218), K0GT (107), K0IIR (130), W4NIM (145), NC0O (121), KC0Q (125), KJ0H (130), and KE0Y (??).

Steve also announced that W0IZ was the winner of the QRP award with 64,575 points and that WE0M had been appointed Public Info Officer for the Section at a remuneration schedule of \$0.00 per decade.

W4NIM was not available to report on any progress regarding the EIDX A video project.

KJ0H reminded everyone to put together 3 slides of their QTH for purposes of display at a subsequent meeting. The pictures maybe of your equipment, antennas, or XYLs. To implement this project a committee was established as follows:

KJ0H--Chairman
W0WP--Tom Lindgren
NC0O--Tom Hise
K0RW--John Lenahan
K0VZR-Tom White

Business Meeting:

NB0H moved that Ron Borkgren be accepted into the EIDX A as a full member--seconded by W0IZ Motion carried.

K0IIR moved that the minutes of the January meeting be accepted as printed in the Newsletter--seconded by K0JGH motion carried. NB0H moved that the

treasurer's report be accepted as printed--seconded by WD0AWL motion carried.

New Business:

W0EJ, Iowa Section Manager, was not available (ill with the flu)--no report given.

W0SR, DXAC advisor, unable to make the meeting due to business conflicts. W0IZ, Dale, reported on current and up-coming Dx operations and methods of obtaining overseas QSLs. W0WP pointed out that European postal rates for Airmail is in 1/4 ounce units.

An open discussion regarding the type of Summer meeting desired was held. Conclusion--no dinner meeting just a regular style session.

W0WP reported that there is available a new DXCC for 10, 40, and 80 meters. He volunteered to keep a want list together for the club and set up the "one ringer" system for those interested.

W0WP again raised the question of club jackets. The club was polled for a consensus--obtaining none President John agreed to bring a sample to the next meeting.

K0VZR, Tom, reported that during the '88 Olympics special calls will be established for HL9 area and to send contacts through him to obtain a certificate.

Program:

The program for the evening consisted of videos--XF4DX DX expedition, a 2nd special event video arranged for our viewing by K0RW entitled "Beloved Husband Of" followed by a short film clip on Safety entitled "Antenna Errections" Staring Laurel & Hardy.

Motion to adjourn by WD0AWL seconded by KF0Z carried. Meeting adjourned 9:03 PM.

Summary:

It was a fun night enjoyed by all. 11 Guest and 19 members were present. Refreshments arranged for by our extravagant President, John, consisted of finger sandwiches, coffee and soda.

The following propagation information was forwarded to the NEWSLETTER from K0GVB, thanks Gary!

PROPAGATION

I. A look at longitude, latitude, and time zones.

II. General sources of propagation materials:

ARRL propagation charts monthly in QST.

Beacons.

WWV (18 minutes after each hour)

ARRL Bulletins,

DX club bulletins.

Band listening.

III. WWV Information (at 18 minutes after the hour)

Solar Flux: A measure of the sun's radiation at 2800 MHZ. Readings above 80 indicate possible 10-15 meter activity.

A Index: Taken once every twenty four hours. (Scale 0-400) A quiet field (10 or less) best for good propagation. (Low wave energy absorption)

K Index: Given for a six hour period. (more "real-time" than "A" index) Rising trend indicates poor HF propagation; a value of 4 or greater means Aurora on VHF.

Solar activity: Relates to very fast changing conditions and is a negative on the ham bands.

IV. Peek at a propagation chart:

1. MUF: On 50% of the days in the predicted period, the amateur band that is open will be just below the MUF curve. (Maximum Usable Frequency)

2. OTC: (Optimum traffic curve) Ionospheric support on 90% or more of days during the month.

3. HPF: (Highest possible frequency) Frequency which will be propagated only 10% of the time.

V. Some factors that strongly influence propagation:

1. Season of the year

2. Level of the solar activity

3. Time of sunrise and sunset at both ends of the circuit...as well as amount of daylight and darkness along signal path. Solar activity must be predicted some seventy days in advance for publication ...so we get sort of a median value.

VI. Super DX edge:

0. peak at display

1. go to display

2. Identify locations on map

3. Load Curve

4. Shift Curve Position

5. Rotate the Earth

6. Solve sunrise/sunset times

7. Determine MUF

8. Great Circle Bearings

TIDBITS

Tom, WBBZRL, has been very active watching the solar numbers climb keeping almost hourly tabs on this new cycle's progress. With a newly installed tribander on his Ely acreage, Tom is looking forward to plenty of low band DX activity this Fall season.

Steve, NUBP, should be settled in his new acreage QTH by press time. When his new XYL, Mary Kay, lets him rest from all the yard work associated with the new home, Steve will be working on the antenna farm. It is worth noting that this new QTH of Steve's is on top of a hill not in the bottom.

NBH, Jack, is enjoying his retirement mixing DXing with his golfing, fishing, exercising and traveling. He has been field testing the new special "voice box" designed by our now famous EIDXer KC8Q, OM Jeffery! The slick digital recorder could be just the key to an "enjoyable" yelling contest (SSB).

KBVZR, Tom, and his brother Cal, stationed in Korea are maintaining weekly skeds without the neighbors pounding on the door. Tom seems to be enjoying the country hamming if not necessarily all the yard work associated with it. We are all looking for big signals on the low bands from these country hams!

NC8Q, Tom, has a new vertical system installed. Tom also hosted the QRP EIDX Field Day outing again this year. The word is the battery powered 5 watt station had a very good score with conditions being called "not as good" as last year.

Dan, NX8W, has his homemade amplifier on the air. Dan purchased 4 new 811As at Dayton this year and reports that the new bottles are made in the USSR!

It has been quiet from the Burlington area. I guess KGRW, John, and his friends are making another "video" to show the club! (keep it clean guys!)

Dave, WBVX, will be moving to the Dallas area from his California QTH. At least he'll be in the same time zone and hopefully be sporting a high tower with one of those BIG Texas beams! Judy, N8IDR, Dave's XYL will surely keep the coffee warm in the ham shack as the sunspots heat up!

Doug, W8SML, promises to become active again as he gets settled in his new QTH. The North East side of Cedar Rapids will have more energy radiated during contest weekends than Duane Arnold would radiate with a cracked reactor tank! NUBP, K8GT, W8SML, W8HUP, NY8V, W8EJ, W8EAN, and KC8XK could all have eyeball qso's together by climbing their individual towers and using megaphones!

President KJ8H, John, is busy with his new job with very little time for radio. Congratulations to John on his nifty CB magazine article (first published in this rag!) Thanks again too for the swell Spring meeting you so neatly organized John!

WB8R, Jim was recently vigorously pursuing the 4J1 operation by Marti Lane and associates. Jim doubts that the DXAC would vote for this one for new country status but believes in the WFWL (workmen first worry later) philosophy of DXing! Jim may be looking for a very large "goone" gun if the friendly electric company doesn't soon quiet those darn' buzzing power lines.

K8GT, Gary, has been reporting fair to good conditions on 6 meters. Is Gary the only one in the EIDX active on that band?

Bob, W4NIM, has been busy getting his house fixed up with his young Bobby home from military school this summer. OM Bob is planning a around the world sailing adventure in the foreseeable future! You need a crew Bob?

The highband DXers have been watching the solar indices closely this summer to catch those elusive E skip opening on 2 meter SSB and CW. W8IZ, Dale, believe it or not, has a great total on the VUCC list too. He must have an HF phone link in that left hearing aid and a VHF model in the other, how else could one catch all those openings and still monitor the repeater?

KF8Z, Jan, has a new TS140S and just "loves" it! A pleasant surprise to hear you on HF so often Jan. Did you know that Jan is such a wizz on the keyboard that he can run an RTTY buffer dry before he turns it over to the other guy (60 WPM live time)? Unreal Jan!

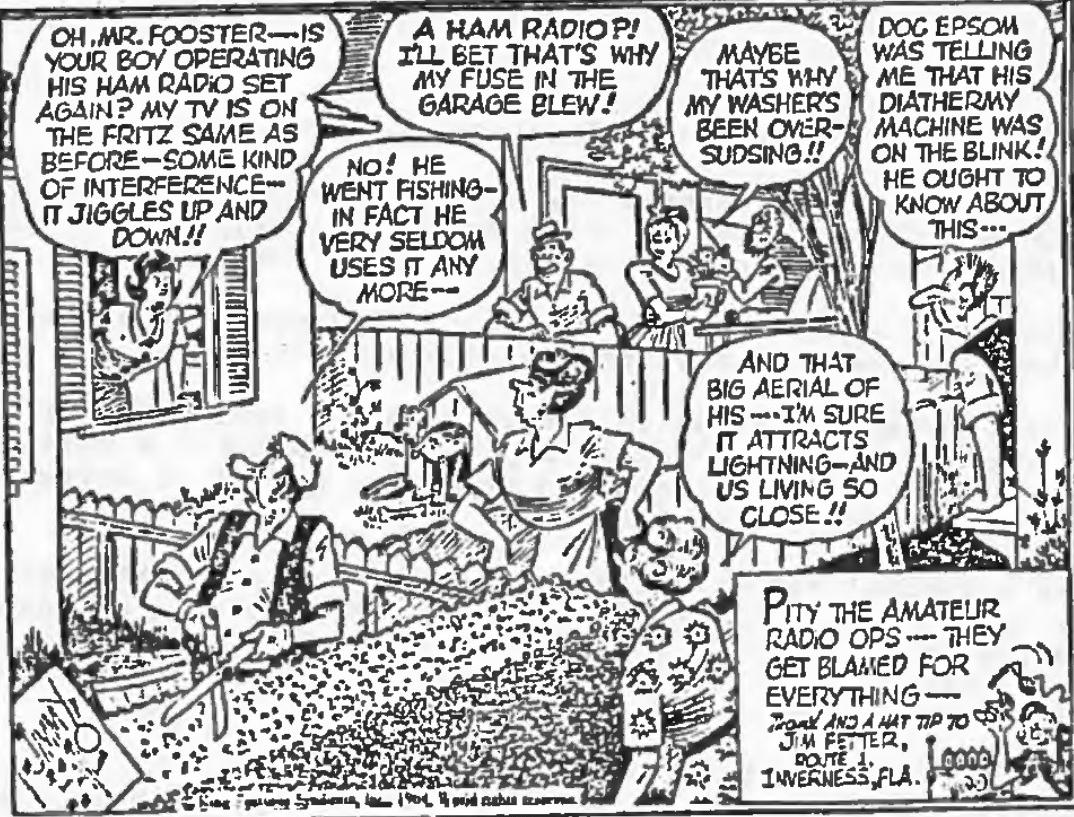

K8GVB, Gary, kindly filled in for me on the Dayton trip this year (I ended up sick). Gary and Patti have been quiet from West Branch as of late, they must be planting more aluminum trees or copper fences down there?

Roger Hoffman, N4RR, reports it is "Darn" hard to keep a little 40 meter beam turning. His 3 element wide space version has been stripping out those 3/4 inch shear pins like butter and the subsequent windmilling is hard on the cables also. Roger is planning on erecting his Rhone 53 tower in the back yard to distribute some of those antennas the 120 foot self supporter is now handling!

It was my pleasure to meet many new DXers down in Muscatine. Hopefully there are some new EIDXers among those fine folks!

They'll
Do It
Every
Time!

By
Jimmy
Hatto

DXCC Notes

The DXCC desk has received evidence that the amateur licenses of Lloyd and Iris Colvin W6KG and W6QL, are invalid. Following a hastily-convened meeting of the ARRL Headquarters Awards Committee, Don Search W3AZD of the DXCC said that the League would have to disallow all the Colvins' operations, as all were based on reciprocal licensing. "Anyone who has submitted a card for any of the Colvins' operations will have to resubmit another card," Don explained. George WØLMY will recall all Yasme trophies. "Damn shame," George said. When informed of the news, Iris shrugged and said, "I'll guess we'll have to get new licenses and go visit them all again."

America's Premier Weekly Amateur Radio Publication

Spratly - 1S Ron Wright ZL1AMO is going on his last DXpedition to Amboyna Cay, in the southern end of the Spratly group. The timetable depends on arranging suitable transportation, but mid-April is possible. Ron says, "This is definitely my last DXpedition. My eyesight is almost completely gone, and I'm going to stay home and continue to drive a taxi in Auckland." Ron will no longer be listening below his frequency, as well as above. Ron repaired the faulty RIT that lead to his listening below when he thought he was listening up. Accompanying Ron will be Baldur Drobnić DJ6SI, who has experience in the region. Callsign will be 1S1AMO. QSL ZL1AMO, with SASE or SAE and IRCs. Watch 3506, 7006, 14025, and 21030 kHz. Baldur will sign 1S0SI, exclusively on SSB. Watch 14160, 14183, 14222, and 14226.5 kHz.

April Fools Day, 1988

The GDO and VOM - Great -But Don't Overlook The XYL

Every ham is familiar with a few of the more common tools of the trade such as the VOM and the GDO. But I often wonder how many realize what an invaluable, but often overlooked accessory the XYL could be....

Even though she may not have a ticket, used properly she may fill the void in the shack and make your operating more pleasurable.

As a for instance, let me relate this lovely incident that occurred at this QTH. Perhaps it will bring a lump to your throat. A definition of love and true affection could not be more dramatic, and if it brings a tear to your eye - it just proves the point.

It was a typical Wednesday evening with the sweet little thing in the living room, eyes glued to the Wednesday night movie on the mahogany knot hole. Meanwhile in the shack I tuned for some rare DX that was coming through on twenty meters. Suddenly to my horror the rotor quit on me and naturally in a direction away from the DX. The beam refused to budge.

I rushed upstairs and explained my plight to the XYL, but she refused to leave the movie. Later during a commercial she agreed to help. Almost the same instant a flash of lightening and a clap of thunder rattled the house.

Undaunted, she donned her lineman's belt, and at that precise moment - I was so proud of her - as she began her ascent up the 4 inch pipe mast. After all she weighs only one hundred pounds, and lineman's belt with cutters, pliers, hammer, small crow bar, twenty five foot roll of RG8U and a few other things she needed, weighed forty two pounds.

I watched her as she shinnied up the pipe, and I could see her quite well during the lightening flashes, and between rolls of thunder I could hear the rattle of tools as they dangled from the belt.

She yelled to me to turn on the flashlight and shine it at the top. She really didn't need the light to find the top, because the only way to the top was up. Anyway she knew the way to the top as she had climbed it many times before. Apparently she was not aware of the price of flashlight batteries.

It had began to rain quite hard, and I yelled at her to get a move on up there because I was getting wet. she had finally reached the top and yelled down for some light. I told her the lightening was so frequent that she could work during the flashes. I told her for being so careless, and since I was getting wet, I was going into the house and dry off. As a nice gesture I watched the end of the movie so I could tell her how it ended as I was sure she would want to know.

When she came in the house she refused to talk to me just because I had yelled at her while she was up on the mast. She wouldn't even listen when I tried to tell her that the movie ended with John and Marcia getting a divorce because John was very mean and unreasonable.

What I originally started out to say is simply that the XYL can be a valuable addition to the shack, although at times they can be a bit difficult.

Since she is still a bit miffed, please don't print my name or call. Better yet, I wish this would self destruct after you read it.

CLARENCE E. FILLEY - W7KE

Hamilton, MT 59840

THE CHARGE OF THE LIGHTNING SENDER

Up from his chair the other day,
A Plug arose in some dismay,
To answer a call from a distant town,
On a wire difficult to hold down.

The office was warm, the hour was late
As that sender started at rapid rate,
And soon he was going like the wind
With the Plug about fifteen words behind.

And faster and faster the dashes rolled,
And the dots like a torrent uncontrolled,
'Till through that office seemed to pour
Some sixty words a minute or more!

And there in the dim and wanling light--
Driving his pen with all his might--
With lips compressed, to his desk inclined,
Sat the Plug, twenty words behind.

Then swift from his pen the hot words flowed
Like chicken tracks in a muddy road;
And as he thought of his terrible need,
He scratched away at his utmost speed!

And soon on his face came a pleasant smile,
For he had caught on to that sender's style;
And as dots and dashes came to his mind,
He soon was not more than ten words behind.

Onward, still onward, at steady pace,
The Plug surely was winning the race.
And when a long special neared its end,
He knew full well that the sender could send.

Sometimes ahead, sometimes in the rear,
At least every word to him came clear.
And when they got through, bear this in mind,
The SENDER was fifteen words behind....

The above from 1935 "R9" magazine. Incidentally,
a "Plug" is the name for a landline telegrapher.

JAPAN INTERNATIONAL DX CONTEST

ANNOUNCING
The 1st Annual "59" Plug
JAPAN INTERNATIONAL DX CONTEST
November 11-12, 1988

The monthly UK magazine called FIVE NINE "59", has the great pleasure of announcing to worldwide amateur stations that a new DX Contest will be held in November 1988. The Five Nine was established in 1985 as a filter's magazine by DXers for all DXers in Japan. The purpose of this contest is to accelerate the activity of radio amateurs in Japan and to establish as many contacts as possible between Japan and worldwide stations during the contest periods.
